OUR PROGRAM

The Television Production Academy is a four-year program that takes students through all aspects of video production. The studio is equipped with state-of-the-art equipment used in studios around the world. Each student is given the opportunity to appear on camera, operate cameras, edit, learn basic graphics, produce a newscast, learn basic drone operation and work on various video projects.

All students in TV Production have the opportunity to take the Storyboard Pro Certification test.

PROGRESSION

TV PRODUCTION 1

Students learn the basics of video production and studio operations. How to operate both field and studio cameras, teleprompter, audio board and Tri-Caster. They learn the production process. Students are introduced to editing and Premiere Pro and proper editing techniques. Also introduced is the Toon Boom Storyboard Pro software which is used by major studios worldwide.

TV PRODUCTION 2

Students expand on the basics of production. Students will shoot and edit numerous video projects. Students will begin to work on script writing and proper interview techniques. Students will continue working on Toon Boom Storyboard Pro.

TV PRODUCTION 3

Students are expected to understand the production process and be able to guide Tech 1 students through it. Students will direct the student run newscasts. Premiere Pro editing will be expanded upon with more detailed projects. Students will continue Storyboard Pro learning.

TV PRODUCTION 4

By their Senior year students are expected to be able to put a newscast on without the assistance of an instructor. They will have the understanding on how to set-up and operate studio equipment. Be able to guide underclassmen on proper studio etiquette. Students in their Senior year also work on The Senior Class video. This will be a culmination of the previous 4 years of video, edited and put to music.
